LILIUM DAHURICUM

# Cold Weather Plants and Lily Bulbs FRED'K H. HORSFORD

Charlotte

Vermont

I have a good surplus of my last Spring's Twenty-fifth Anniversary Catalog—1893-1918 and I have decided to ask my customers to order from this the coming season. If you have mislaid last spring's Annual drop me a card and one will be mailed you.

The prices, of course, are scaled considerably lower than they would need to be if a new list were printed, but the difference in prices probably only balance the cost of a new annual and it would seem to be better this year to let my customers have this than the printer.

Shipping conditions are still very uncertain and the recent ruling of the Federal Horticultural Board at Washington which prohibits, after June 1st, 1919, the importation of many of the bulbs, plants and shrubs, in which the Nursery, Seed and Florist trade is interested, will affect every individual in the trade, and calls for economy in the transaction of business this year until conditions are again normal. Our customers' and our interests are identical, and both will be served in this way of using last year's annual.

We are not able to get stock from Holland, and it is quite uncertain as to whether any stocks will be allowed to come in from Japan; unless the embargo is lifted before the end of February only seeds can come in this spring. Fortunately I have a fine stock of most of the kinds listed last year. There will be a few exceptions as well as a few additions.

We never had so many complimentary letters for our goods as last year, and fully realize our success can only be permanent when your success is permanent. We could not take time to thank all our friends for kind letters received owing to scarcity of help and wish to do so now. Also to thank our many customers for kind patronage in the past and to assure them that we will do all in our power to fill orders carefully and promptly the coming year, and now that the war is over may we not hope for better times in this respect and in express and freight conditions as well.

### PLANTS, BULBS, ETC., THAT WILL PROB-ABLY BE OUT OF STOCK THIS SPRING.

Adlumia cirrhosa.

Dianthus Grass or Clove Pink. Also var. Mrs. Sinkins.

Dianthus Jennie Horsford, Isabella and Pallida.

Dicentra Canadensis, D. Cucullaria and Spectabilis.

Gypsophila paniculata, double variety. Iberis Tenoriana.

Lilium speciosum roseum and Testaceum. Phlox divaricata.

Primula Sieboldii Ranunculus acris fl. pl. Aplectrum hvemale.

Aspidium Goldieanum.

# PLANTS IN STOCK THIS SPRING

Not offered in Last Spring's Annual.

Achillea filipendulina. Nice to plant among shrubbery. Flowers bright yellow. 15 cts. each.

Aquilegia Long-Spurred Columbines. Various colors mixed. 25 cts. each.

Convallaria Majalis. Lily of the Valley. 20 cts. each. \$2.00 a dozen.

Delphinium King of the Blues. Medium height and one of the best delphiniums. 20 cts. each. \$2.00 a doz.

Delphinium Caucasicum. Tall, with handsome blue flowers. 20 cts. each.

Dianthus deltoides. White, low growing. 20 cts. each.

Dianthus Delicata. Hardy Garden Pink. Soft delicate rose. 20 cts. each. Dianthus Homer. Hardy Garden Pink. Rosy-

red with a dark center. 20 cts. each.

Dianthus White Reserve. Hardy Garden Pink. An everblooming pure white. 20 cts. each.

Dianthus Snow. Hardy Garden Pink. Fine pure white. 20 cts. each.

Dianthus Caesius. Chedder or Cliff Pink. Flowers delicate rose and fragrant. 20 cts.

Dianthus Newport Pink. The well known salmon colored or salmony-rose. Sweet William. 20 cts. each.

Lychnis Alpina. Nice in sunny portions of rock-

work. 15 cts. each. \$1.50 a doz. Paeonia Mary Tudor. Cream white center tinted rose and outer petals a deeper shade of rose. 25 cts. each.

Veronica longifolia Blue Ridge. An excellent new variety of longifolio, a handsome dark blue and a distinct variety. Larger and taller than the subsessile. 20 cts each.

#### TREES AND SHRUBS IN STOCK

This Spring not offered in last year's Annual.

Betula papyrifera. Paper or Canoe Birch. 3 to 5 ft. 25 cts. each.

Betula papyrifera. Paper or Canoe Birch. 6 to 8 ft. 35 cts. each.

Betula populifolia. 8 to 10 ft. 35 cts. each.

Betula lutea. Yellow or Gray Birch. 3 to 4 ft. 25 cts. each.

Betula lutea. Sweet or Aromatic Birch. 4 to 6 ft. 35 cts. each.

Common American Chestnut. 3 to 4 ft. 25 cts. each.

Cornus mascula. Cornelian Cherry. 2 ft. 20 cts. each. \$2.00 a doz.

Genista tinctoria. Dyer's Broom. 20 cts. each. \$2.00 a doz.

Lonicera Tatarica Alba. 30 cts. each.

Lonicera Early Dutch. 40 cts. each.

Picea Alba. Canadian Spruce. 18 to 24 in. 30 cts. each.

Rhododendron Rhodora. 45 cts. each.

Red Flowering Horse Chestnut 3 to 4 ft. 45 cts. each.

Rosa Polyantha. A fine single White flowered hardy rose. 25 cts. each.

Striped Maple. Bark greenish, striped with white lines. Handsome medium sized tree of upright, dense habit, with bright green, large foliage, turning clear yellow in autumn. 3 to 5 ft. 25 cts. each.

Syringa Vulcan. A fine dark purple form. 2 to 3 ft. 40 cts. each.

·Syringa Japonica. 2 to 3 ft. 35 cts. each.

#### F. H. HORSFORD,

Charlotte, Vermont.

#### INTRODUCTION

Autumn planting is all right if done at the right time and the plants properly cared for. Woody plants should not be set until all growth has ended for the year, usually after the middle of October. Many of the herbaceous kinds may be set in August and September. I would refer you to my spring list for many kinds suitable for fall planting. When plants are set in the fall, if they have time to get a little start before cold weather, they give a greater return the next year than when set in spring. The later the setting is done in the fall the more carefully should they be protected the first winter. Many of my most successful customers insist that they have much better results with autumn planting. I would especially recommend late summer or early fall for the setting of Pæonias. For transplanting evergreens late August and first part of September seems to be best for fall. I am inclined to favor spring when just as convenient.

Shrubs and trees should be well mulched or banked, when set in fall, for the first winter.

Early-set tulips and other fall bulbs may not require much covering, but those set late should have it, and almost all herbaceous perennials set in the fall should be well protected against the warmer spells of weather which come in winter. It is the warmer spells followed by extreme cold ones which do the damage. If, when hardy plants are once frozen in for the winter, they could stay so until severe frosts are past in the spring, they would seldom be injured. This covering should not be removed in spring until danger of severe frosts is past.

Kindly remember that those who purchase plants should return them within five days if not satisfactory. After five days I will not replace them. See fourth paragraph on second cover page of my Spring Catalogue.

#### LILIES

Most of the Lilies of this list may be sent in September; but a few, like the Auratum and all the Speciosums and Henryi, are not ripe until the middle of September or October. Orders will be filled from beds as long as my stock lasts, except Candidums which are imported.

Lilium candidum makes a fall growth each year, and it is not so well for this lily when the setting is postponed until late, especially in the North.

Candidum lilies should not be planted more than three or four inches under, but in this northern climate we find it best to cover with some straw or swale hay just before winter, and this should be removed in the spring.

For cultural directions and more definite descriptions, please see . Spring Catalogue which has been mailed.

The prices do not include postage or express, but are simply for bulbs boxed and delivered to my nearest express office.

···· E.	ACH	DOZ.
Lilium auratum	0.25	\$2.50
L. canadense (Meadow Lily)	.15	1.50
L. candidum (Madonna Lily). Should be set early to in-		
sure full growth	. 18	1.75
L. Brownii. One of the finest	. 60	
L. croceum. Golden yellow; blooms next after the		
Dahuricum	. 20	
<b>L. Dahuricum.</b> I find this to be as reliable and hardy as		
any kind I have tried and I think it will stand more		
frost than any other. The flowers are red and of good		
size, and the plant with age attains a height of 3 to 4		
feet in good soil	. 15	
L. elegans. Orange	. 15	1.50
L. elegans umbellatum	. 20	2.00
L. elegans fulgens (L. Batemanniæ). Flowers deep apri-		
$\cot$	. 20	2.00
L. elegans incomparable. Deep red	. 15	-1.50
L. elegans Thunbergianum. This form, I suppose, is		
typical L. elegans. It is a very hardy and permanent	,	
	•20	
L. elegans Wallacei. This is a later form of L. elegans with		
smaller flowers and a reliable form. It comes along after		
the Fulgens	.15	1.50

L. tenuifolium.....

L. tigrinum splendens.....

# DAFFODILS, or NARCISSI

Early-flowering bulbous plants, coming before the tulips and after the crocus. One of the most important groups; fine for cutting and of easy culture. Though any good garden soil suits, they prefer a rather stiff, deep soil, and if the situation is such that they are shaded from the sun a portion (a third or a half) of the time, so much the better. They do well among shrubbery. To get the best results, they should be set in August or September, to make a good root growth before winter. When late setting is done, the best results are postponed until the second season.

Many of the bulbs we plant in the fall—tulips, hyacinths, narcissi, etc.—make a root-growth underground after being set. If we dig up such bulbs a week or two after they have been set, we are surprised at the new root-growth which has formed at the base of the bulbs. This root-growth is often made quite late and at low temperature. Therefore, when such bulbs are planted quite late in the fall, it is well to place a thick covering of straw, manure, leaves, or some sort of covering over them to keep out frost as long as possible, that this root-growth may continue even after the surface of the ground is frozen. I have seen good results obtained in this way with late planting. The covering should come off with the early spring before the bulbs are up.

EACH	DOZ.
Bicolor, Empress. Very large flowers; white perianth,	
rich yellow trumpet; strong grower and fine for cutting,	
per 100, \$3.50	\$0.55
Bicolor Horsfieldii. Very large and early; yellow trumpet,	
white perianth	.45
Bicolor, Victoria. A grand Trumpet Daffodil, with large,	
bold, erect flowers; perianth creamy white, trumpet rich	
yellow; per 100, \$3.25	. 65
Burbidgei. One of the most charming for cutting. Clear	
white cup, margined bright cinnabar-red; a beautiful	
early flowering form of Poeticus which comes before	
Poeticus ornatus; very effective when bunched. The	
color of the cup is very rich when cut and opened under	
glass; per 100, \$2.00	.25
Burbidgei, John Bain. Large; broad white perianth, with	
small citron-yellow cup and orange-scarlet edge	. 50
Emperor. Large flowers with primrose petals and deep	
yellow trumpet; per 100, \$3.00	. 50

I	EACH	DOZ.
Henry Irving. Noted for its deep yellow, wheel-shaped		
perianth, and large and handsome yellow trumpet	. 04	.40
King Alfred. A very appropriate name for this grand new		
Daffodil, it stands high above all other varieties,		
flowers of extra size, and a beautiful shade of deep		
yellow, borne on long, stiff stems. The flowers last well		
as cut flowers or left on growing in the bed. It is a		
Daffodil that has to be seen to be fully appreciated	. 25	2.50
Leedsii. Silver white, starry perianth; lemon-yellow cup,		
passing to white; sweet-scented flower; fine for boquets;		
per 100, \$1.50	. 03	.25
Mrs. Langtry. Broad white petals with large white cup,		
edged yellow	.04	.35
Poeticus. Pheasant's Eye; per 100, \$1.20	.03	.25
Poeticus ornatus. One of the earliest of Poet's Narcissi; a		
free bloomer; per 100, \$1.30	.05	.35
<b>Princeps.</b> Per 100, \$1.20	:03	.25
Incomparabilis, Sir Watkin. A grand flower; sulphur-		
yellow cup; per 100, \$2.50	. 04	.40
Incomparabilis, Double (Butter and Eggs). A large and		
showy double variety. One of the largest of the double		
sorts	.04	.30
Von Sion, Double. Large, golden yellow	.04	.30
Orange Phoenix. Double, white and orange; per 100, \$1.50	.04	.30
Sulphur Phoenix. This is considered much finer by some		
than Orange Phœnix. It flowers a little later	.04	.30
Mixed Daffodils. To naturalize in meadows, etc.; a first-		
class mixture, comprising many of the best herein listed;		
per 100, \$1.25	.04	.30
Alba plena odorata. Double Poet's Narcissus. Double,		
pure white, very sweet-scented. Cannot be forced.		
Succeeds best in rather heavy soil and partial shade	.03	.30

# CROCUSSES

The ordinary spring-flowering Crocus will thrive in nearly all soils and positions. They do better planted in September than they do later or they may be set in August.

		DOZ.	100
Mixed Crocuses.	All colors	.\$0.10	\$0.40

### TULIPS IN MIXED COLORS

Tulips like good drainage, and when planted over a gravelly subsoil or bottom, succeed best. It is a good plan to surround bulbs with sand, unless they are put into a sandy soil. A depth of 4 inches is none too deep for cold climates. Set the bulbs 5 or 6 inches apart.

	DOZ.	100
Large Early Single		
Large Late Single		1.00
Large Early Double		1.40
Large Late Double		2.00
Artus. This fine red Tulip is one of the best for cutting of		1 50
bedding; it comes early and lasts well		1.50
Canary Bird. A clear golden yellow flower, large and		
handsome	30	
Cottage Maid. Fine rose, flushed white; one of the best	t	
pink Tulips	30	2.00
Duke of York. One of the best double Tulips; carmine-rose	е	
color, broadly edged with white	30	2.00
Golden Crown. Golden vellow, edged with red. One of the	e	
best for naturalizing, as it increases rapidly		1.50
Queen of the Netherlands. Soft rose, suffused with white		
extra-large flower. One of the best Tulips for cut-flower	*	
or any decoration		
Pax alba		
La Reine. Large White		
Rose Gris-de-lin. White, shaded with delicate pink; extra		
fine		
Mixed. 500 for \$3.50.		.75 <sup>v</sup>
Parrot Tulips. Choice Mixed Varieties		1.75
<b>Darwin Tulips.</b> These are later-flowering Tulips, and con		
tain many new and beautiful shades; flowers borne or		
long stems. Recommended for massing in shrubbery		
or very decorative in the flower-garden. Good mixture		0.55
of all colors		2.75
Bybloem Tulips. White ground, marked with lilac, rose		
purple and violet shades. These are late-flowering and		
effectively grown in groups of a dozen or more	30	

# PLANTS NOT OFFERED IN SPRING LIST

	EACH	DOZ.
Achillea var. Boule de Neige. A fine double White.		
Claimed to be an improvement over The Pearl	.15	
Achillea filipendulina. Nice to plant among shrubbery.		
Flowers bright vellow		
Aconitum Autumnale. The latest flowering Aconitum.		
Large spikes of dark blue flowers		
Aquilegia-Long-Spurred Columbines. Various colors		
mixed		2.00
Camassia esculenta. Flowers vary from dark blue to		
· ·		
white		
long panicled racemes coming in July		2.00

T. recurvatum. Brown Purple	15	

#### SURPLUS LIST

These sets are made up mostly of plants mentioned in my Spring Catalogue and are knids of which I have the largest stock. We have more time to make these sets in autumn and offer them at lower rates on this account.

These offers are not open to spring delivery, because then we cannot spare the time required in filling them. Those wishing to take advantage of any offers for shrubs, trees, etc., in this list for spring setting, can get them in November, and cover them in any well-drained soil, leaving only the tips of branches exposed, where they will keep in perfect condition, and may be set in the spring as soon as the ground is ready. For cost of boxing trees and shrubs, see my Spring Catalogue. These prices do not include postage. These offers are subject to surplus stock being sold. This stock is not a poorer grade than is used in filling orders for single or dozen lots. Deciduous trees and shrubs had better not be moved before October 15. Bulbs and plants which are entirely covered when set can be ordered until winter prevents.

Shrubs, trees, and plants, set in autumn and mulched well before winter to prevent heaving, often do better than when set in spring, especially when spring setting is late. Trees may be banked up 6 to 10 inches with soil; shrubs may be mulched with 3 to 4 inches of straw manure; and herbaceous plants may be covered lightly with brush, pine boughs, buckwheat straw, or any similar substance, that will protect without smothering.

This protection for winter is ver important for all plants, shrubs, and trees set in the fall in our northern climate the first year. After they have become established the shrubs and trees and most of the herbaceous plants need not be covered.

Please do not ask us to divide these offers, nor to fill orders from this list after December 1.

20 Viburnum, 2 or more kinds	1.60
25 Maples, 3 to 5 ft., in 3 or more kinds	2.50
25 Ligustrum Ibota, (Hardy Privet). About 2 ft. This Privet	
is the only hardy one I have found entirely suited to Vermont	
climate. It is invaluable as a hedge or border plant	2.00

#### Address F. H. HORSFORD,

Charlotte, Vermont.
